

Position: Senior UI Software Engineer
Tracking Code: 516
Location: Westford, MA
Position Type: Full-Time/Regular
Apply Link: [NETSCOUT - Sr. UI Software Engineer, Westford, MA](#)

Position Summary:

This is a fully hands-on development position, that requires strong skills in HTML/JavaScript. Knowledge of application framework like Ember will be a plus. Candidate should be a talented software engineer with the ability and passion for building and delivering cutting edge products. Focus will be on the UI (HTML/Javascript), but should have the ability to work in Java as well if required. Candidate will be part of a cross-functional team responsible for designing, developing, and testing diverse features of the next generation dashboard product.

Required Skills:

- B.S. or M.S. in Computer Science or equivalent.
- Position requires 4+ years of programming experience.
- Strong background in UI design and development.
- Proficiency in HTML 5 / Javascript / Java platforms.
- Working knowledge of JQuery.
- Programming experience with client/server architectures and multi-threading development.
- Strong object-oriented design, analytical & problem solving skills.
- Excellent written & oral communication and presentation skills.

Preferred Experience:

- Knowledge of application frameworks like Ember will be a plus.
- Knowledge of development release tools such as GIT and Maven.
- Ability to work effectively in a global team distributed across geographic locations.

All qualified applicants will receive consideration for employment without regard to age, race, color, religion, sex, national origin, sexual orientation, gender identification, disability or protected veteran status.
