 *
 * The array data in this file is for the term that began in April 2023, which
 * is why 2023-04 is part of the file name.
 *
 * This data is read from an auxiliary JavaScript file so that it can be easily
 * changed from one semester to another. Putting the data in an auxiliary file
 * separates the program LOGIC from the DATA that the program works on. This is
 * analogous to specifying all program layout via CSS to separate program CONTENT
 * from RENDITION.
 *
 * The statements in the auxiliary JavaScript file "push" onto the array, which
 * means they add data at the end of the array. Each statement pushes an entire
 * subarray onto the top level array, resulting in a data structure with the 4
 * "columns". These columns are, in order:
 * | Room # | Instructor Name | Course Name | Time Slot |
 * where "Day Period" is:
 * "A" for 7:10- 8:30
 * "B" for 8:40-10:00
 * "C" for 10:10-11:30
 * "D" for 11:40- 1:00
 * "E" for 1:10- 2:30
 */

```
