

UltraEdit Editor Customization Tips

compiled by Jesse M. Heines, last saved April 27, 2022

To turn off **automatic tag completion**,

- (1) in the horizontal menu at the top of the window, click **Advanced**
- (2) click **Settings** in the **Configure** group to bring up **Configuration** dialog box
- (3) expand the **Editor** section by clicking the **+** sign next to **Editor** (if necessary)
- (4) click **XML / HTML / Markdown**
- (5) uncheck **Automatically close XML/HTML tags**

To turn off **image preview**,

- (1) in the horizontal menu at the top of the window, click **Advanced**
- (2) click **Settings** in the **Configure** group to bring up **Configuration** dialog box
- (3) expand the **Editor display** section by clicking the **+** sign next to **Editor display**
- (4) click **Miscellaneous**
- (5) uncheck **Display image tooltips**
